

NONPROFIT ABILITYNET TAPS THE POWER OF NETSUITE TO TURBO CHARGE ITS FUNDRAISING EFFORTS

Fundraising is difficult enough for nonprofits. Add poor demand planning to the mix, and the task becomes Herculean. That's the situation AbilityNet faced. Manual inventory tracking tools led to stock write-offs and wasted time for the nonprofit, which helps disabled people get the most out of technology. What's more, inconsistent financial data was hampering the ability of AbilityNet's leaders to apply budget controls.

“We use NetSuite across the business—it's put us firmly back in control and has improved life for our users and our clients.”

AbilityNet

NONPROFITS NEED THE RIGHT TOOLS

Bringing automation to fundraising

After an exhaustive review, AbilityNet chose NetSuite over Goldmine and Microsoft Dynamics NAV, and the decision brought immediate results, delivering the automation needed to stretch the nonprofit's limited funds. Case in point: a new NetSuite-powered sales order processing engine was up and running in just over a month.

Every little improvement helps

The combination of consistent customer data and accurate demand planning has strengthened AbilityNet's fundraising efforts. Automated order-processing is saving time and reducing the costs associated with manual methods, and optimised asset and inventory management has improved audit compliance.

Taking fundraising to the next level

Nonprofit fundraising is one of the most difficult business tasks to undertake, and trying to do it with inferior technology only

adds to the challenge. With NetSuite as its business engine, AbilityNet is approaching its fundraising activities more efficiently than ever.

Company Snapshot

Company: AbilityNet

Location: Warwick, United Kingdom

Industry: Nonprofit

Systems replaced:

Sage, SharePoint, Legacy Systems

NetSuite product implemented:

NetSuite
