

# SUITESOLUTIONS: PDF GENERATOR

Addressing Your Printing Needs

We understand that it is essential to obtain copies of your records, transactions and search results from NetSuite in the style and format that fit your business needs. PDF Generator provides more flexibility on the styling, printing and email functionality of NetSuite records, transactions and saved searches. Additionally, you can use this solution to print and customize the print output of transactions that do not have direct printing capabilities.

## How It Works

PDF Generator's print functionality allows users to generate a PDF of records using specific templates. The templates are easily configurable for your preferred style and data output. This solution provides a user interface to select multiple records for bulk printing. The selected records are consolidated in a PDF file and emailed to the user.

## Key Features

- Addresses printing requirements on records or transactions.
- Configurable templates for generating professional PDF output.
- Easily bulk print and email PDF files.
- Rich mapping and data transformation capabilities.
- Conveniently retrieve generated PDF files.
